

Shoe Sizing Guide

Print this page

Print this on an 8.5"x11" piece of paper at 100% scale. Make sure to check print accuracy with the tool below.

Align your child's foot

Line up your child's foot on the "place heel here" marker. Make sure your child is putting weight on the foot being measured!

Make a mark

Mark where your child's longest toe reaches on the chart. Add 1/4" for wiggle room & growth!

Measure the other foot

Now take a measurement of the other foot. Make sure to go with the size of the longer foot!

- ✓ Measure both feet using this chart.
- ✓ Compare measurement to Brand Size Chart. If there's not a Brand specific chart, use our general Size Chart as a guideline.
- ✓ Still unsure? Then give us a shout, we're here to help.

 **TIP:** It helps to place a book or similar hard object on line to press heel against.
